Allied PhotoChemical's receives (15) and (16) Canadian patent on Key US-Developed UV Technology.

Allied PhotoChemical continues to lead UV Coatings Industry with Research & Development firsts...

MARYSVILLE, MI – January, 2010 – Allied PhotoChemical recently received 15th and 16th Canadian Patent based on a key UV Silver and Electroluminescent Lighting Technology:

Canadian. Patent: 2,368,372 Issued: 12/01/2009

For: Ultraviolet Curable Silver Composition and Related Method

Canadian. Patent: 2,385,041 Issued: 11/24/2009

For: UV Curable Compositions for Producing Electroluminescent Coatings

“Allied PhotoChemical continues to re-invest in UV Research and Development based off our customer's direction and key market drivers,” said Kelly, “Being solely dedicated to UV Technology allows Allied PhotoChemical to fully understand the technology, plus deliver this Sustainable technology to our customers in the form of significant ROI savings.”

“Allied PhotoChemical announced its Sustainable UV™ initiative last year, which outlined the importance of UV Technology in the manufacturing environment,” says Dan Sweetwood – Vice President of Sales, “This initiative delivers ROI – Return on Investment and the environment through Faster line speed, etc., Smaller WIP, Energy Costs, Quality Costs, etc., and Cleaner – No VOC's, HAP's, etc.”

Allied currently has over 80 patents reserved solely for UV Technology. Allied is focused on producing:

- UV Paints & Coatings - UV Silver Conductive Inks
- UV Dielectrics - UV Lubricants
- 100% UV Electroluminescent EL Displays - Specialized UV Formulations.

ALL based on 100% Solids Technology / No VOC's, No HAP's, No NVP's

In addition, Allied PhotoChemical holds a significant number of Trade Secrets and Trade Marks.
